

Suvarna Chauhan

UI/UX Designer, Researcher

I design intuitive interfaces grounded in research, creating clear, impactful solutions that enhance user experiences. With strong tech knowledge and attention to detail, I create accessible, high-performing designs that enhance human-computer interaction.

EXPERIENCE

UI/UX Designer Trainee - Copan Consultancy Services

Panchkula , {Jun 2025 - Jul 2025} - {Dec 2025- Apr 2026}

- Designed and developed user interfaces for Cisco and Western Digital's enterprise products
- Cisco Partners Portal: Developed application enabling Cisco partners to view and manage incentives across individual product portfolios with improved navigation and reduced complexity
- Reduced user interaction complexity by minimizing clicks in the existing model, resulting in 30% reduction in task completion time
- Graduation Project - Rolling Quarters Process at Western Digital: Created a seamless application to streamline the rolling quarters workflow, eliminating friction points and improving process efficiency
- Collaborated with cross-functional teams including product managers and developers to ensure design feasibility and implementation excellence

UI/UX Design Intern - Mentorsity

Remote, Jan 2025 - April 2025

- Designed and developed pitch decks to effectively communicate business goals, user insights, and design solutions to clients and stakeholders
- Conducted overall user experience evaluation of existing websites to identify usability issues and recommend improvements
- Created responsive UI designs for company websites, ensuring consistency with brand identity and enhanced user interaction

UI/UX Design Intern - Leadsquared

Bangalore, May 2022 - May 2023

- Contributed significantly to the design system by creating 250+ icons used across 3 different platforms
- Developed smooth animations for mobile application using Rive, enhancing user engagement
- Successfully implemented design system resulting in more efficient and user-friendly mobile application experience
- Collaborated with design and engineering teams to maintain consistent and cohesive user interface across products
- Used strong analytical thinking and problem solving skills to develop solutions to challenging situations.
